

Basile LECOUTURIER

French student looking to become a creative frontend developer

I am a French IT engineer student interested in creative frontend development. I am currently looking for a 6 months internship from January 2023 . I would like to find a company with an organized development and creative team. Passionate by web development and its technologies, I would very much like to work on current web technologies and discover some new tools, languages, framework, and projects architectures. I am curious and I am not afraid of giving ideas and my opinions.
